

PRECISION AND FUTURE MEDICINE

Clinical features and CMR indications

Supplementary Table 1. Classification of usefulness of cardiovascular MRI proposed by SCMR

| Classification | Usefulness |
|----------------|--|
| Class I | Provides clinically relevant information and is usually appropriate; may be used as first-line imaging technique; usually supported by substantial literature or randomized controlled trial(s). |
| Class II | Provides clinically relevant information and is frequently useful; other techniques may provide similar information; supported by limited literature. |
| Class III | Provides clinically relevant information but is infrequently used because information from other imaging techniques is usually adequate. |
| Class Inv | Potentially useful, but still investigational. |
